PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with a strong passion for Cloud Computing and AWS. Hands-on experience in designing AWS infrastructure, automating cloud resources using Python and Boto3, and implementing serverless solutions with AWS Lambda. Currently expanding expertise in Terraform, cloud automation, and modern backend technologies while actively building real-world cloud projects.

EDUCATION

Gayatri Vidya Parishad College for Degree and PG courses

Bachelor Of Technology - Computer Science and Engineering

Graduation: 2029

PROJECTS

AWS Cost Optimization using Lambda & Boto3

- Building a serverless solution to identify stale AWS resources.
- Automating cloud resource management using Python and Boto3.
- Integrating EventBridge scheduling and SNS notifications.

EC2 Automation using AWS Lambda

- Automated EC2 start and stop operations using AWS Lambda.
- Used Python (Boto3) to interact with AWS APIs.
- Configured EventBridge schedules and monitored execution through CloudWatch Logs.

Production-Style AWS VPC Architecture

- Designed a secure VPC with public and private subnets.
- Configured Internet Gateway, NAT Gateway, Bastion Host, and Security Groups.
- Implemented networking best practices for secure application deployment.

AWS CLI Resource Management

- Managed AWS resources using AWS CLI.
- Practiced automation of common AWS administrative tasks.

Technical Skills

Cloud : AWS

AWS Services : IAM, EC2, S3, VPC, Lambda, Cloudwatch, SNS

Programming : C , Python

Automation : AWS CLI, Boto3

Version Control : Git , Github

Operating Systems : Windows and Linux

CERTIFICATIONS

- AWS Certified Cloud Practitioner Essentials
 - Computer Networking by Scaler
-
